POMP AND CIRCUMSTANCE

Tis the season for warm weather, beautiful flowers, and caps and gowns. It's a time when students are proud of their accomplishments as they finally receive their diploma or degree during their school's commencement ceremony. It's a time of reflection and a time of anticipation.

However, imagine you’re a teenager or a young adult and suddenly you’ve been told that you have sustained a very serious physical injury which will require several months of hospitalization and rehabilitation. A flood of thoughts may suddenly go through your head such as, “How and why did this happen to me?” “Could I have prevented this,” “I’m a good person, I don’t deserve it.” However, one question that may not be initially asked by a teenager or young adult is, “How will I complete my education?”

That question is never avoided when a patient is admitted to Magee. All patients between the ages of 14 and 21 are met by two Adolescent and Young Adults Counselors to discuss their educational and vocational goals. MaryKate Miller and Vilma Mazziol run the Adolescent and Young Adult Program at Magee. The Program was established in 2008 thanks to a Grant through the Percival Roberts Trust Fund.

One of many services through this Program is coordinating Homebound Instruction Services for High School Students. Teachers from the patient’s school are welcome to provide tutoring at Magee or tutoring services can be coordinated through an outside educational tutoring agency. Miller/Mazziol have assisted more than 60 patients with Homebound Instruction while at Magee. This has allowed students to graduate with their class and not miss a year of schooling. For many patients, this a huge accomplishment considering the amount of therapy time that everyone is required to complete.

This year, five high school students will be graduating with their class thanks to the Adolescent and Young Adult Program at Magee. Four out of the five students will be attending college for the Fall 2012 Semester. Each student has been referred to their college’s Office for Disability Services for accommodations and the Pennsylvania Office of Vocational Rehabilitation will assist some of these students in pursuit of their educational goals.

All of the staff at Magee are very proud of each and every student and we wish them all the best in their future endeavors.
SPINAL CORD RESEARCH & EDUCATION

UPPER EXTREMITY RECONSTRUCTION PROGRAM

The Regional Spinal Cord Injury Center of the Delaware Valley (RSCICDV) is pleased to announce the re-introduction of our Upper Extremity (UE) Reconstruction Program in August 2012. Magee staff have been working in collaboration with Dr. Charles Leinberry of the Rothman Institute and Thomas Jefferson University Hospital, to provide a clinical program that will focus on upper extremity neurologic dysfunction. Monthly clinics will be held at Magee Rehabilitation Main Hospital in the first floor Follow Up Clinic, and will include evaluations and recommendations from Dr. Leinberry and Magee’s Occupational Therapy staff. Magee’s Case Management staff will play a critical role in helping individuals to identify their ability to benefit from this outpatient program. The UE Reconstruction Program will focus on issues related to skeletal reconstruction, releases, or possibly tendon transfers covering the shoulder down through the hand. If you would like more information on accessing this Clinical Evaluation program, please contact the Outpatient Follow Up Clinic at (215) 587-3394.

UNDERSTANDING HEALTH CARE NEEDS OF INDIVIDUALS AGING WITH SPINAL CORD INJURY

Researchers at The Regional Spinal Cord Injury System of the Delaware Valley (RSCISDV) at Thomas Jefferson University are interested in conducting interviews to better understand the health care needs of individuals aging with spinal cord injury. We are seeking volunteers to share their experience through interviews. Research participants must be age 60 or older and have sustained a spinal cord injury a minimum of 5 years ago, or be a caregiver of an individual who meets the criteria. You will be required to participate in a one-to-two hour interview in your home or another familiar or convenient location. You must also be able to speak and understand English. If you are interested in participating, please call the Spinal Cord Injury Center at (215) 955-6579 or Stephen Kern (Principal Investigator) at (215) 503-8013.

EFFECTS OF TWO DIFFERENT FES CYCLING PROGRAMS

The Spinal Cord Center at Jefferson and Magee, along with researchers from the University of Sciences, are conducting a study to learn how different cycling programs may help adults with spinal cord injury. We are looking at the effects that may decrease your risk of cardiovascular (heart) disease and other health problems including: the strength and make-up of the bones in your legs; the size and strength of your leg muscles; the amount of fat-free tissue in your body; and your cholesterol levels and nutritional status. The study will require you to cycle with FES for 1 hour, 3 times a week at Magee’s Outpatient center for 6 months. You will also have testing completed at 3 different time points: 1) before starting the cycling, 2) after cycling for 3 months, and 3) after cycling for 6 months. Some testing will be completed at Jefferson.

You are eligible to participate in the study if you:

- Are 18 to 70 years old (women must be premenopausal)
- Have a spinal cord injury and are unable to move your legs
- Can attend 60 minute training sessions 3 times per week for 26 weeks at Magee’s Outpatient Center
- Can attend data collection sessions 3 times
- Have no major medical problems
- Have not broken a bone in your leg in the past 3 months
- Are not pregnant

For more information, please contact either Therese Johnston, PT, PhD, MBA (Principal Investigator) at (215) 596-8682, Marilyn Owens, R.N. (Study Coordinator) at (215) 955-6579 or Elizabeth Watson, PT, DPT (Senior Physical Therapist) at (215) 218-3900.
EKSO IS COMING TO MAGEE

As Magee strives to maintain an active state of the art collection of therapeutic technology to be used throughout the continuum of care, we are pleased to announce the addition of a new exoskeletal (“outside the skeleton”) device into our repertoire of dynamic orthoses available for therapy and patient trials. Acquisition of the new EKSO, by Ekso Bionics of California is yet another form of training for walking function that includes the newest in technology to assist an individual with limited voluntary movement. The initial technology was developed for use in the military and is now being applied to health care needs.

The EKSO is a bionic device engineered to help those with paralysis stand up and walk on their own. It’s described as a “wearable, artificially intelligent, bionic device,” and it assists with walking. Initially, the device will be used only in rehabilitation centers under supervision, and can be adjusted to fit most people between 5'2" and 6'4" (and weighing 220 pounds or less) in a matter of minutes. Ease of use and adjustability are important features. A personal model will not be available for sale to individuals until 2013. The new EKSO program will be available at the Magee Riverfront Outpatient site starting the end of the summer 2012.

NEW PUBLICATIONS/PRESENTATIONS BY RSCICDV STAFF

RESEARCH PARTICIPANTS WANTED

This study will be investigating the benefits and limitations of first time exposure to adaptive sports for young adults ages 18 – 30 who have sustained a traumatic lower level spinal cord injury. The goal is to better understand the perception of participants regarding their first introduction to adaptive sports, in an effort to improve the methods used to help integration after injury. By volunteering to participate in this study, you will be asked to participate in one face-to-face or phone interview with the researcher, a physical therapist Ph.D. candidate. Interview questions will seek to gather information related to the nature of your spinal cord injury, demographics and your introduction to adaptive sports. Participants who complete the study will have the opportunity to choose a nominally priced gift card from one of two online shopping locations.

Volunteers must meet the following criteria:

a) traumatic lower level spinal cord injury;

b) currently between the ages of 18 – 30; and

c) have completed inpatient rehab within the past 5 years.

For additional questions regarding the study, or if you would like to participate, please contact Ariana Brutico at ArBrutico@hotmail.com or by phone at 570-510-7112.

PROJECT ENABLE

Project Enable is looking for people to join our program. Sponsored by the National Science Foundation in conjunction with East Stroudsburg University and New Mexico State University, our program is designed to introduce individuals with mobility disabilities to computer science. Unemployment rates for persons with disabilities is nearly 78% and the demand for employment in computer science fields is increasing! Computer science careers are more accommodating to individuals with disabilities than many other careers. Work schedules are flexible and many computer science careers allow employees to work from home. During the workshops, participants will meet professionals employed in computer science fields, learn about new/emerging technologies (including assistive devices), and get an idea of what life is like on a college campus by touring a local university. Participants will be paired up with a mentor who is either a student or professional in the computer science field that can offer assistance and provide advice to someone considering an education and career in computer science. There is no cost to participants; in fact participants earn a total of $1,000 to be part of the Project Enable program.

At this time all workshops are currently full. Please contact us if you would like to be put on a waiting list.

To be considered for this program you must be at least 14 years of age, be interested in computers, and have a mobility disability. For an application and more information, please contact Kim Roselli, Program Coordinator East Stroudsburg University, kmr5090@gmail.com. Don’t miss out on your future!

SPINAL CORD SOCIETY

The Spinal Cord Society is a large grass roots organization with thousands of members throughout North America and other countries. Its goal is to cure of chronic spinal cord injury paralysis. The Spinal Cord Society puts 100% of its funding into research for the cure of spinal cord dysfunction. The Spinal Cord Society meets at Magee Rehabilitation Hospital on the 6th floor at 1 pm on the first Saturday of every month. If you would like to support this research, consider attending one of these meetings.

For more information, please contact Chris Cellucci at cellucci@ursinus.edu or (610) 296-7429, or Dennis Ledger at dledger@esc.com or (856) 468-4401.
ONGOING RESEARCH OF THE RSCICDV

Current
1. Zoledronic Acid to prevent bone loss after acute spinal cord injury. Sponsor: NIDRR supported through SCI Model System of Care
2. Responsiveness of the Capabilities of the Upper Extremity Test. Sponsor: NIDRR supported through SCI Model System of Care
3. Understanding the health care needs of individuals aging with spinal cord injury. Sponsor: NIDRR supported through SCI Model System of Care
5. The Value of MRI and DTI as biomarkers for classifying acute spinal cord injury. Sponsor: Department of Defense

Completed Clinical Trials
1. A Phase I Safety Study of GRNOPC1 in Patients with Neurologically complete, subacute, spinal cord injury. Sponsor: Geron Corporation
2. Investigation of assistive technology for mobility by individuals with spinal cord injury. Sponsor: NIDRR supported through SCI Model System of Care
3. UAB Index of Motor Recovery – Validation of an outcome measure for motor recovery in incomplete spinal cord injury. Sponsor: NIDRR supported through SCI Model System of Care
4. Development and validation of the thoracic-lumbar control scale to measure strength and coordination of trunk muscles. Sponsor: NIDRR supported through SCI Model System of Care
5. Development and validation of the Capabilities of Arm and Hand in Tetraplegia (CAHT) measurement for upper extremity function. Sponsor: NIDRR supported through SCI Model System of Care
6. Spasticity and Joint Position Testing in Individuals with SCI. Sponsor: Regional Spinal Cord Injury Center of the Delaware Valley
7. A 15-Week, Randomized, Double-Blind, Placebo-Controlled, Parallel-Group, Multi-Center Trial of Pregabalin for the Treatment of Chronic Central Neuropathic Pain After Spinal Cord Injury. Sponsor: Pfizer Pharmaceuticals
9. Restoration of walking after spinal cord injury – Reliability of the maximal WISCI level. Sponsor: National Institute on Disability and Rehabilitation Research (NIDRR)
10. A phase II, double blind, placebo-controlled, multicentered study to assess the efficacy and safety of HP184 at 100, 200, and 400 mg doses administered orally once daily for twenty-four weeks in adult subjects with chronic incomplete spinal cord injury. Sponsor: Aventis Pharmaceuticals
11. Peripheral denervation following spinal cord injury (Using MRI to study nerve function following spinal cord injury). Sponsor: American Paraplegia Society
15. A phase I/IIa dose-ranging study to evaluate the safety, tolerability, and pharmacokinetics of BA-210 and the neurological status of patients following administration of a single extradural application of Cethrin® during surgery for acute and cervical spinal cord injury. Sponsor: BioAxone Therapeutics, Inc.
16. A four-week, prospective, randomized, double-blind, placebo-controlled trial to assess safety, tolerability, Pharmacokinetics and preliminary efficacy of AV 650 in patients with spasticity due to spinal cord injury. Sponsor: Avigen
SPINAL CORD INJURY SUPPORT

SCI & SEXUALITY: EDUCATIONAL SUPPORT GROUP

Couples or Individuals Groups
Meets every Tuesday from 6-7:15
Groups are held in room 220
YOU pick the topics.

Topics covered may include: dating, relationships, body image, assistive devices, sex & medicine, relationship roles, contraception, sexual values, intimacy, sexual health, partners as caregivers, sex with ourselves, sex with others, communication, anatomy and physiology...

For more information, please contact Trisha Kozlowski at (215) 587-3121.

SCI PEERS, sharing experiences

SCI-Peers are trained volunteers who have learned to cope with their own spinal cord injuries. The peers are available to meet with you to answer questions regarding life after a spinal cord injury. SCI-Peers have various levels of injury, as well as various life experiences.

To request a peer consultation, or to volunteer as a mentor, contact Marie Proesto or Sonya Dibeler at peers@mageerehab.org or (215) 587-3174.

ADDITIONS MENTORS

The Addictions Mentor Program at Magee Rehabilitation Hospital is designed to offer those who struggle with addiction issues the opportunity to talk with a specially selected and trained person who has experience as an addictions advocate. The Addictions Mentors are an exciting addition to the overall Peer Mentor Program. Addictions Mentors are currently available to inpatients at Magee Rehabilitation Hospital.

Addictions mentors can:

• Offer support
• Accompany patient to AA/NA meetings held at Magee Rehabilitation Hospital
• Share information and resources.
• Serve as a connection to the community for patients during the transition after Magee.

Addictions Mentors are needed! If interested in becoming an Addictions Mentor, you must be two years clean and/or sober and be willing to participate in Peer Mentor training. Please contact Ruth Black at (215) 587-3030 or peers@mageerehab.org.

SCI FAMILY PEERS

Family Peer Mentors are family members and/or loved ones of individuals who have sustained a SCI and have successfully transitioned to living life with a disability. They are volunteers who are specially trained to guide and provide SCI related information and experiences to families and loved ones of newly injured individuals.

Mentoring can be done in the form of participating in the family group which is held twice monthly at Magee or contacting a new family by telephone or face to face if possible. Given the geographic area Magee serves, we attempt to be creative and flexible with mentoring requests.

For more information or to become a Family Peer Mentor, please contact Ruth Black, LCSW at (215) 587-3030 or rblack@mageerehab.org.
MAGEE RECREATION RESOURCES

Physical activity is an integral part of physical and psychological well being. Everyone, regardless of ability or disability, should have access to recreation, so we plan to actively recruit new athletes to join our teams. If you already play a wheelchair sport and would like more information about our program, or if you are interested in a recreation activity that we do not yet offer, please contact us!

Magee Wheelchair Sports teams are always looking for volunteers who would like to learn more about wheelchair sports and help during fundraisers, at practices and tournaments. If you have any questions or would like more information on any of our teams, please email sports@mageerehab.org or call 215-587-3140.

MAGEE WHEELCHAIR SPORTS TEAMS

BASKETBALL: MAGEE SIXERS SPOKESMEN
Practices are held every Wednesday evening from 6:30 pm—9 pm (Sept.—May).
Contact: Binh Scott at binhscott@yahoo.com for more details.
Location: Carousel House (corner of Belmont Ave. & Ave. of the Republic, Phila., PA 19131)

RUGBY: MAGEE EAGLES
Practices are held Tuesday evenings from 6:30 pm—9 pm (Sept.—May).
Contact: John Benson or Heather Schulz at eagleswheelchairrugby@gmail.com for more details.
Location: Carousel House (corner of Belmont Ave. & Avenue of the Republic, Phila., PA 19131)

TEEN: MAGEE FREEDOM
Practices are held each Sunday from 12 pm—2 pm (10 am—12 pm in the summer).
Location: Cherry Hill Racquet Club (1820 Old Cuthbert Rd., Cherry Hill, NJ 08034)
Contact: sports@mageerehab.org or 215-587-3140

RACING: Contact: sports@mageerehab.org or (215) 587-3140. Magee will sponsor hand-cycle and wheelchair athletes for the 2012 Philadelphia marathon on Sunday, November 18.

Currently our Power Soccer and Softball teams are not practicing, but if you would like more information about either of those activities, please contact Meg Rider at sports@mageerehab.org or call (215) 587-3140.

Our wheelchair athletes recognize how fortunate we are to have a rehab hospital such as Magee fund our sports program, and we give back to the community by performing outreach events in the Philadelphia area. This season our teams performed demonstrations at many universities and organizations including: University of Pennsylvania, Rowan University, West Chester University, YMCA West Chester Wells Fargo Center, Radnor High School, University of the Sciences Philadelphia, Richard Stockton College of New Jersey, and a Boy Scout Camp.

We encourage everyone to become involved in physical activity, whether it is in a competitive sport or at an intramural level. Please join us as we add more recreational opportunities in the coming months and years. If you would like Magee to consider adding a specific activity to our program, please call (215) 587-3140.

UPCOMING ADAPTIVE SPORT EVENTS AND ORGANIZATIONS OF INTEREST

- Magee Freedom Tennis Tournament - August 10-12 at Cherry Hill Health & Racquet Club
- Global Abilities Rec Fest - Saturday, September 29 at Carousel House
  www.globaabilites.org/recfest.html
- Philadelphia Marathon - Magee will sponsor hand-cycle and wheelchair athletes for the 2012 marathon on Sunday, November 18. For more information, please call (215) 587-3140.
- West Chester YMCA Adaptive Sports Programs: 2nd Sunday of each month.
  www.ymcabw.org/adaptedsports.html
- PA Center for Adaptive Sports: Promotes adapted recreation, and sport opportunities for persons with physical and neurological disabilities, including rowing and cycling.
  www.centeronline.com
- IM ABLE Foundation: Created to build on the active lifestyles that founder, Chris Kaag, promotes for individuals with disabilities. www.getupandmove.org
COMMUNITY PROGRAMS

LEGAL CLINIC FOR THE DISABLED

The Legal Clinic for the Disabled provides free legal services to low-income people with physical disabilities in Philadelphia, Bucks, Chester, Delaware and Montgomery Counties, Pennsylvania.

Since 1990, the Legal Clinic for the Disabled, a 501(c)(3) non-profit corporation with offices at Magee Rehabilitation Hospital, has helped thousands of people. We help victims of domestic violence get legal protection from their abusers. We represent victims of identity theft and consumer fraud. We help parents and caregivers access healthcare for their children. We write wills, powers of attorney and living wills. Most of our clients experience physical limitations in their daily activities, and many have suffered catastrophic injuries or illnesses like stroke, spinal cord or brain injury, multiple sclerosis, cancer, advanced diabetes, glaucoma, AIDS, amputation or epilepsy. Our services help them overcome legal problems and continue living comfortably and independently in the community.

For more information about our clinic, please visit our Web site at: www.lcdphila.org.

LEGAL CLINIC TOPICS:

HUNGER DOESN'T TAKE A SUMMER VACATION!

by Elizabeth Oquendo, Esq.

The warmer temperatures remind us that vacation time is around the corner, but it's important to remember that hunger doesn't take a summer vacation!

Here at the Legal Clinic for the Disabled, many of our clients have school aged children, and often need all the help they can get to make ends meet when children are out of school. Providing an extra meal a day and figuring out activities to keep kids busy can put some financial strain on a family. Thankfully, there are plenty of programs throughout the city to keep kids busy and full throughout the summer.

The Summer Food Service Program, sponsored by the City of Philadelphia, provides free lunch and snacks to youth up to age 18 at any participating center. The program also provides a free lunch and snack to any physically or mentally challenged person regardless of age, if they are enrolled in a specialized program for the physically or mentally challenged. No registration or enrollment is necessary and meals are served right in the community at a variety of sites including schools, day care centers, houses of worship and community centers.

To find the summer meal site closest to your home, please call 311 or visit the following website: http://www.hungercoalition.org/summer-meals

There are also a variety of free and low-cost summer day camp opportunities in Philadelphia. The city of Philadelphia provides activities at various recreation centers for children and teens. To find out what activities are happening in a particular community, please visit http://www.phila.gov/findrec/. Other organizations such as the YMCA and the Boys and Girls club also provide summer day time activities. To learn more about summer day camp and mentoring programs available in the area, please visit: www. http://www.Cap4kids.org/philadelphia and look under After School/ Camps.

With summer meals covered and a fun activity plan in place, families will be sure to enjoy a safe and happy summer!
MAGEE’S MEDICAL LEGAL PARTNERSHIP BRINGS LAWYERS TO THE CARE TEAM by Elizabeth Oquendo, Esq. and Sherry Thomas, Esq.

At Magee, physicians, nurses, therapists and case managers all work together to ensure that patients are given the best chance to overcome their injuries and conditions through high quality rehabilitative medicine. However, a patient’s recovery may be affected by non-medical factors as well. Many patients who come to Magee find themselves in unforeseen situations that require advice from attorneys who are trained to help families address these issues. For example, take the following case:

A patient arrives at Magee after having a stroke which has affected the patient’s mobility and ability to verbally communicate. The patient is expected to be in the hospital for over a month, and he is concerned that his family will be unable to carry on the financial responsibilities that he holds. It is almost the end of the month, and the patient fears that his inability to make it to the bank or execute personal checks will hamper the family’s ability to meet their financial responsibilities.

At any other medical facility, this patient’s options would be limited to his ability to hire a private attorney to draft and execute planning documents such as a Power of Attorney. In the spirit of holistic care, Magee has partnered with the Legal Clinic for the Disabled (LCD) to form an on-site Medical Legal Partnership. Today, this patient would be able to contact his case manager and ask to speak to an attorney onsite to get any required planning documents completed at no cost to him.

Although LCD has partnered with Magee for the past 20 years, we are excited about this wonderful opportunity to integrate our attorneys into the Magee care team. Working alongside case managers, physicians and other medical professionals, LCD hopes to become a part of the high quality services Magee provides. Housed on the second floor of Magee, LCD attorneys handle a variety of legal issue areas including planning documents, family law and housing law.

The Legal Clinic for the Disabled provides free legal services to low-income people with physical disabilities in Philadelphia, Bucks, Chester, Delaware and Montgomery Counties, Pennsylvania. Since 1990, the Legal Clinic for the Disabled, a 501(c)(3) non-profit corporation with offices at Magee Rehabilitation Hospital, has helped thousands of people.

We help victims of domestic violence get legal protection from their abusers. We represent victims of identity theft and consumer fraud. We help parents and care givers access healthcare for their children. We write wills, powers of attorney and living wills. Most of our clients experience physical limitations in their daily activities, and many have suffered catastrophic injuries or illnesses like stroke, spinal cord or brain injury, multiple sclerosis, cancer, advanced diabetes, glaucoma, AIDS, amputation or epilepsy. Our services help them overcome legal problems and continue living comfortably and independently in the community.

For more information on LCD’s services, please contact a case manager or call our intake line, Wednesdays from 9:30-3:30 at (215) 587-3350.

---

Join LCD as we celebrate 25 years of providing free legal services to low-income individuals with physical disabilities.

Our services enable our clients to live safely & independently in their community.

FRIDAY, SEPT 28, 2012 • THE WESTIN PHILADELPHIA DINNER • SILENT & LIVE AUCTION • MUSIC

For additional information or to make a donation please contact

LCD • 215.587.3214

Linda Peyton • lpeyton@lcdphila.org

The official registration and financial information for LCD is available from the Pennsylvania Department of State by calling toll free, within Pennsylvania, 1-800-732-0999. Registration does not imply endorsement.
**THINK FIRST**

To help prevent disabling head and spinal cord injuries among children, teens and young adults, Magee’s Think First Program holds dynamic presentations at schools. Our program is part of the nationally coordinated Think First program. Presentations consist of a video, injury prevention lessons and testimonials from adults with disabilities.

If you have a spinal cord injury or brain injury and are interested in changing behaviors and saving lives, please consider joining Think First and speaking to students. Since Magee values your experience we will reimburse you for your time.

If you are interested or know of a school that would like to host one of our assemblies, please call Joe Davis, Think First Coordinator, at (215) 587-3400.

**PATIENT RESOURCE CENTER**

The Patient Resource Center is located on the 6th floor. Feel free to stop by. We have tons of interesting fiction, a number of best seller books including notable books that made Oprah Winfrey’s Book Club list. There are about 600 leisure/romance/mystery novels to choose from as well as a broad selection of relevant professional periodicals. You may have noticed that we have three computers spaced just right for patient, visitor and staff access and to supplement these resources, we also have an assortment of DVDs.

Please allow us the opportunity to provide you with extraordinary customer service and an enviable user friendly environment.

You may contact Venus Bradley at (215) 587-3146 with any questions, concerns or suggestions.

**ALL DISABILITIES - SURVIVOR STORIES NEEDED!**

We are interested in posting Spinal Cord Injury, Amputation, Stroke and Traumatic Brain Injury survivor stories on our peer website. Hearing about other individual’s struggles and triumphs can be very therapeutic especially when in the midst of your own. All stories are welcomed, whether you’re an old injury, new injury, complete or walking, young or old. Stories need to be inspirational to future survivors!

Challenges early on:
- medical
- physical
- emotional
- transitioning home
- transitioning into community

What helped you overcome challenges?
- equipment (adaptive)
- attitude
- resources

How is life now? Accomplishments!
- activities
- work
- school
- recreation
- dating
- relationships

Stories may need to be edited. Please contact us with any questions at peers@mageerehab.org or (215) 587-3174. We really hope you consider doing this! Send them in as soon as you can. For those of you who already have sent in your stories, thanks so much. We hope to have them up and running on the website soon.
